

# Windings for pioneering technology leader

## OVERVIEW

Location

**North Italy**

Solution

**Windings BR 185**

Project date

**2024**

### **MANUFACTURE AND SUPPLY OF WINDING BLOCKS TO REPAIR DAMAGED TRANSFORMER FOR SWISS TECHNOLOGY LEADER.**

The customer required two winding blocks to repair a damaged transformer in their factory that was causing disruption to production.

After analysing the drawings and receiving materials from the customer's supplier in cw13, the Co.Bo.T team started production of the two winding blocks.

The expert Co.Bo.T windings team ensured the winding blocks were completed and delivered within the agreed timescale.

The customer was happy with the windings that were engineered to their exact requirements, enabling them to restore their transformer promptly while minimising downtime and disruptions to their factory operations.
